

## FENCES

The fence consists of round posts diam. 14 cm grooved lengthwise and chamfered at the top end and half-round elements diam. 10 cm as inside filling. Underground groove between posts is filled with 2 round elements diam. 5cm. All elements are fixed with galvanized nails. The half-round fence is relatively inexpensive as compared with other solid fences, easy to mount and brings a pleasure to the eye with its natural wooden beauty for a long time. Such a fence will fit in harmonically with other wooden structures, already constructed or planned on your territory.

code	section dimensions, cm length (L) × height (H)	cross bar dimensions, cm ø (d) × length (L)	post dimension , cm ø (d) × length (L)
Solid 10-250\187^10	250 x 187	10 x 250	14 x 250

\* Supplied in standard packets, as palisades and half-palisades.
